

## KITCHENS & BATHROOMS

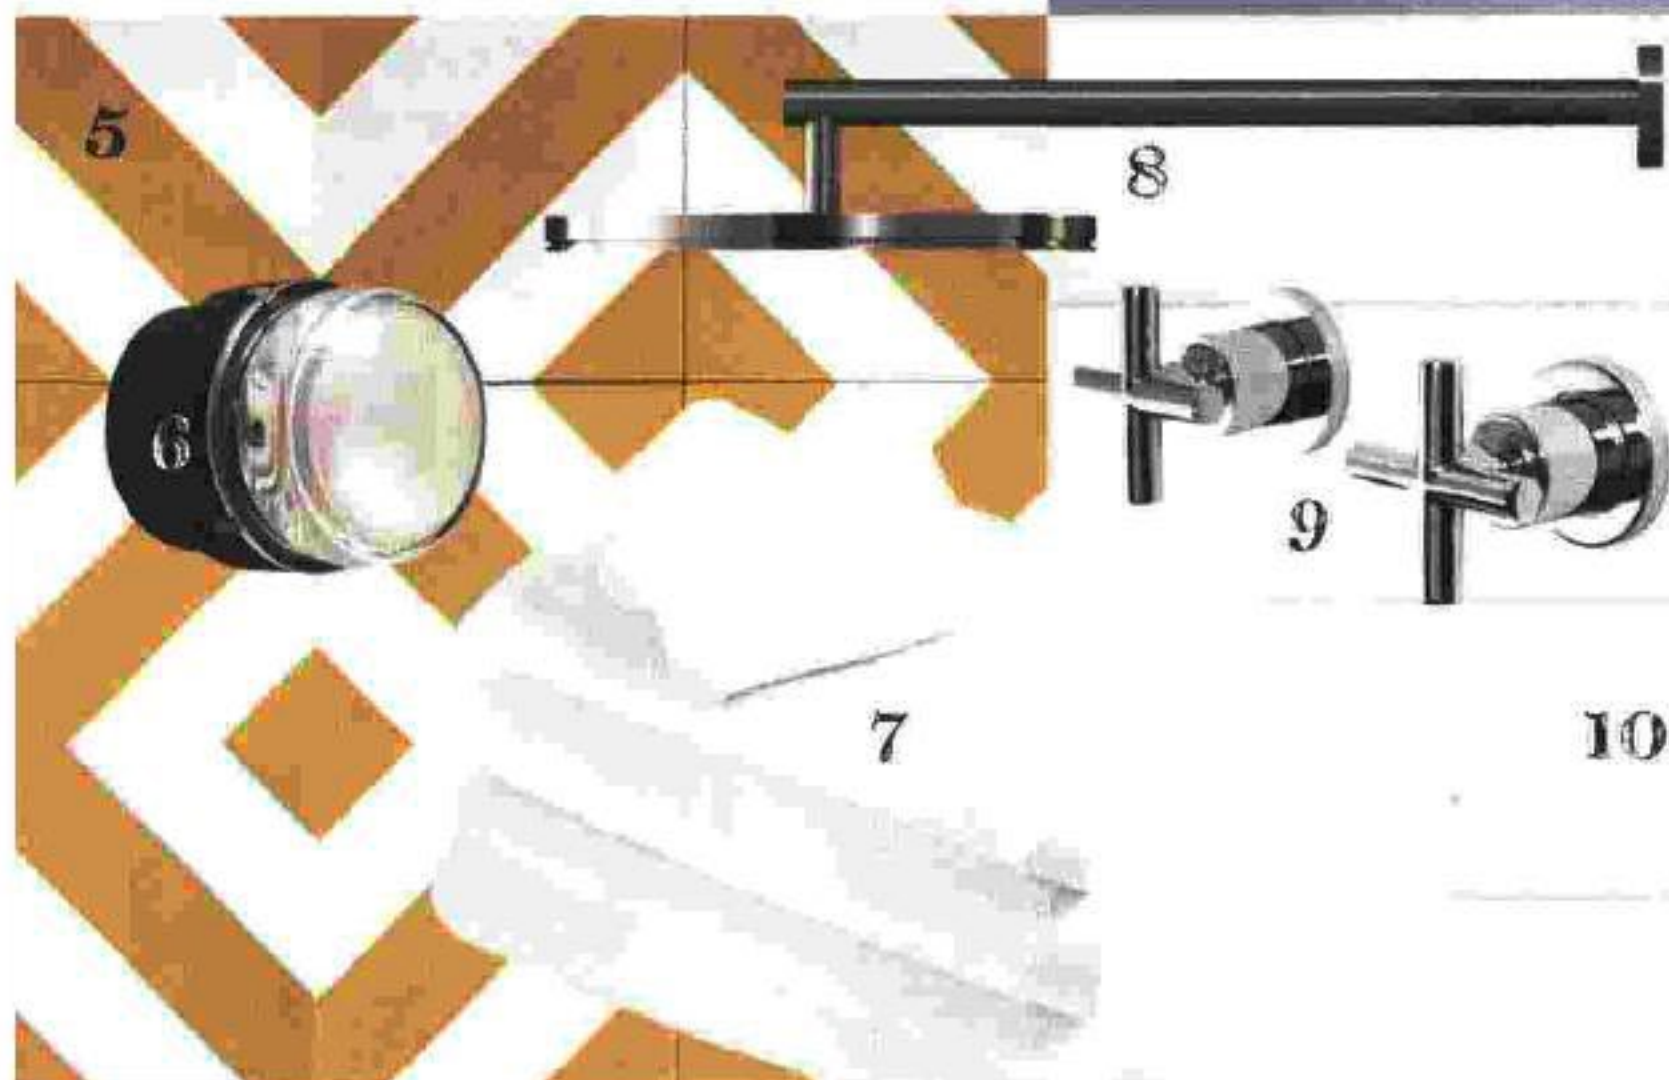

### BRIGHT SIDE

COLOUR DRIVES THE SUNNY SCHEME OF THIS LA DESIGN

A sun-soaked climate makes Los Angeles the perfect location for this unabashedly vibrant design. American architect Barbara Bestor, who conceived this sunny bathroom for a family of four, often centres her schemes around colour, and here in this room the geometric egg yolk-hued floor tiles marry well with the yellow of the custom-made vanity. The marble top adds an element of luxury to an otherwise simple decor that includes classic white subway tiles on the walls and a modern frameless shower wall. Seen through the window, the view of the garden connects the bathroom to the outdoors, and allows the Southern California light to stream in, creating a space that balances function with play.
